

Class #1

Outdoor Equipment

Cody recently spent a long weekend exploring a national park, an experience he never had before but really enjoyed. He lives in a small community with only a local hardware store, so his choices for camping supplies have been limited. He plans on doing more camping and is shopping online for a camp stove that he can use on the trips he plans on making in a few months. He is looking for something he can cook meals for himself and his camping buddies (2), so he'll need to be able to cook multiple dishes at the same time or he'll spend all his camping time cooking. They will be camping out of the back of their pickup in the open, so it should be portable and able to work in windy conditions. Access to replacement fuel cylinders is important for his stove. Most hardware stores carry standard fuel cylinders. He wants to spend no more than \$100 (excluding tax and shipping/handling) on a quality, reliable, camp stove that will last him through several seasons of camping. He wants the best deal for his money that matches his camping needs.

#1

Orvis Stainless Camp Stove - \$89.99

After a long day spent on the trails, in the field, or on the water, nothing is as satisfying as a hearty camp meal. This stainless hunting camp stove will make cooking breakfast, lunch, or dinner one of the highlights of the trip. Pressure regulated for consistent performance, it features two large 3 $\frac{3}{8}$ " burners (12,000 BTUs each), and a push-button Piezo igniter. Stainless steel drip tray makes clean up a cinch. Regulator assembly and 24" hose included. Easily converts to bulk cylinder operation. Uses 16.4-oz. propane cylinder (not included). Stainless steel. Imported.

- Model Number: 4980
- Pressure regulated
- Two, large 3 3/8-in, 12,000 BTU burners
- Push-button Piezo igniter
- Chrome-plated drip tray
- 24-in hose and regulator included
- Easily converts to bulk cylinder operation
- Uses a 16.4-oz propane cylinder (not included)

#2

Coleman® PerfectFlow™ 2-Burner Stove - \$69.99

Cook breakfast, lunch and dinner on a stove that folds up easily with the Coleman® PerfectFlow™ 2-Burner Stove. The large cooking surface gives you space to prepare different dishes. Once this propane-powered camp cooker starts to heat up, PerfectHeat™ Technology gets the temperatures just right, WindBlock™ Shields keep the wind from blowing the flames around and the PerfectFlow™ Pressure-Control System keeps the heat steady on each of the high-performance 10,000-BTU burners. When you're done, the removable rust-resistant, aluminum-steel cook top makes cleaning quick and easy.

- PerfectFlow™ pressure-control system
- PerfectHeat™ Technology for burner efficiency and optimal product life
- WindBlock™ wind shielding system for maximum heat
- Two 10,000 BTU burners
- Rust resistant aluminum-steel cook top
- Enough stovetop space for a large pan or griddle
- Boils a quart of water in 4.5 minutes
- Works from bulk cylinder with accessory hose (not included)
- 1 cylinder of Coleman® propane powers both burners for 1.1 hours on high, 4.5 hours on low
- Closed measurements 14.75 in. x 23.25 in. x 5.5 in. (37.47 cm x 59.06 cm x 13.97 cm)
- Includes 1 full cylinder

#3

Best use: Backpacking
Canister: Isobutane-propane
Auto ignition: No
Burn time (max flame): (8 oz. of fuel) 60 minutes
Average boil time? 3 min. 30 sec.
Ultralight: Yes
Dimensions: 5 x 4 x 3.5 inches
Weight: 2.6 ounces

MSR Micro Rocket Stove - \$97.93

A trip into the unknown shouldn't make you give up certain luxuries... and by luxuries, we mean coffee. The MSR Pocket Rocket packs easily for long treks and boils water in save-your-life quick time. Its easy assembly and simple operation mean you don't have to prime or pressurize the stove to get a flame going, and its brilliant simplicity means maintenance is small to non-existent.

- Weighs in at just 2.6 oz. (75g) and has a compact design that allows it to stow easily
- Fully adjustable flame, from a rolling boil to a slow simmer, lets you cook meals; control valve is easy to operate even with gloved hands
- Boils 1 liter of water in 3 min. 30 sec.
- Sturdy folding pot supports provide better stability than earlier MSR designs
- Tri-sectional WindClip™ located at the burner helps shield the flame from a breeze
- Stove is simple to operate, with no priming, preheating or pressurizing required; simply turn it on, light and start cooking
- MSR MicroRocket stove includes a hand-held piezo igniter that easily sparks the stove to life
- Due to flammable item shipping restrictions, we cannot sell fuel canisters online; they are available at REI retail stores
