

Computers

Kimberly is looking to buy a new computer. She will be using his new computer at college this next fall. She needs it to have multiple USB ports for her flash drives and other electronic devices. She wants a computer with ample memory and a Windows 8.1 operating system. Kimberly primarily wants this computer to write papers and do research on the internet. So it is important for Kimberly to have proper software on her computer for college. She is on a tight budget and has received a gift card from Grandma for \$350 to spend on a computer including tax (sales tax 8.25%).
